- [Sponsored by the Engineers' Society of Western PA](#)

As the preeminent international technical forum in industrial water treatment, the IWC has recorded a proud history of this dynamic industry, with over 69 years of remarkable achievements. The IWC brings together the water treatment industry's end users, researchers, practicing engineers, managers, educators, suppliers, contractors and consultants.

The IWC seeks papers to cover all aspects of industrial water treatment that include but are not limited to:

Activated Carbon
Biological Wastewater
Boiler Water
Condensate Polishing
Cooling Water
Desalinization
Flue Gas Desulfurization
Food & Beverage Industry Water Use & Treatment
Future Trends in Industrial Water Treatment
High-Purity Water
High-Salinity Water in Industrial Applications
Hurricane Preparation - Lessons Learned
Innovative Technologies
Ion Exchange Resins
Legionella
Maritime Ballast Treatment
Membranes
Monitoring
Nuclear Power Plants
Outsourcing
